---

## 🛠 SKILLS

**Technologies:** JavaScript | TypeScript | ReactJS | TailwindCSS | Firestore | HTML5 | CSS3 | Chakra UI

**OS/Tools:** Windows | Git | Github | Vercel | Netlify | Figma | VSCode | Slack

**Soft Skills:** Teamwork | Collaborations | Communication

---

## 📁 PROJECTS

- **ERASMUS** (*ReactJS, Tailwind CSS, Chakra UI, Firebase*) - A platform to book rooms and houses for landlords and tenants. Landlords are able to put up apartments for rent and manage their properties. Tenants can find different rental options that suit their needs.
- **WEATHER-APP** (*ReactJS, Tailwind CSS, Axios, Chakra UI*) - A real time weather tracking application. On loading the website, it automatically loads the weather forecast of the user's location. There is also the search feature to look up the weather forecast of other cities.
- **TO-DO** (*Tailwind CSS, Firebase, ReactJS*) - A simple To-Do application to keep up with tasks and do them efficiently. Users can add, edit or delete tasks.
- **CHARITFIX** (*Tailwind CSS, ChakraUI, ReactJS*) - A platform for a charity organization. It gives details about what the organization does and users are able to donate to different causes.
